Teams' HANDBOOK

B-TECH Junior is a competition that brings together high school students to develop innovative solutions at the intersection of business and technology. This event challenges participants to identify real-world problems and propose feasible, scalable, and impactful solutions.

Through this competition, students enhance their entrepreneurial mindset, problem-solving skills, and teamwork abilities, preparing them for future challenges in the tech and business world.

CRITERIA & EVALUATION PROCESS :

Is the project well-structured and clearly explained?

Presentation & Communication (30%)

Is the idea original and unique ?

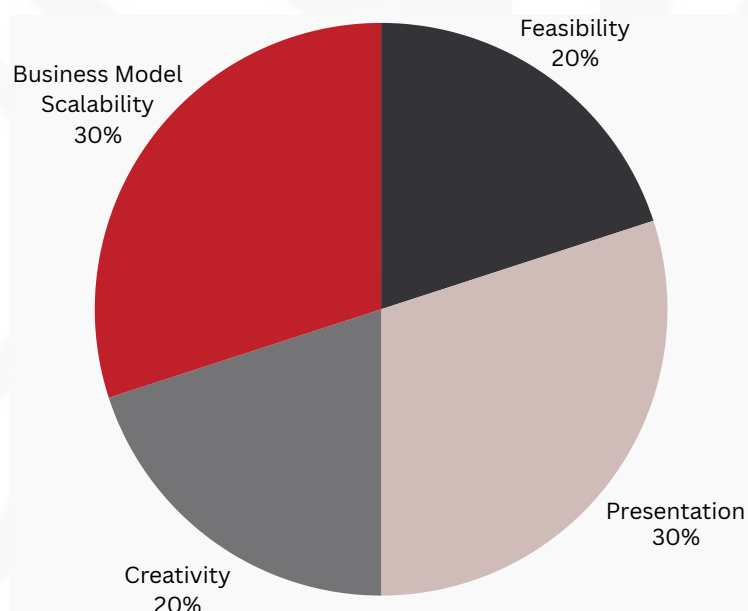

Innovation & Creativity (20%)

Is there a clear market opportunity ?

Business Model & Scalability (30%)

Can the solution be realistically executed ?

Feasibility & Implementation (20%)

GZ-GD-GZ-GD

B-TECH JUNIOR 2026 THEME :

Your project should focus on innovative ways to enhance transportation through technology and business solutions.

Ask yourself :

- What are the main challenges in the transport today?
- How can technology improve transport experiences?
- How can your idea contribute to the economy and sustainability?

STEPS

- **INTRODUCTION :**

Briefly introduce your project Explain the link between your project and this year's theme: Transport.

- **PROBLEMATIC (The Problem Statement) :**

Clearly define the problem or challenge in the transportation. Explain why this issue matters and its impact. Provide data or examples to support your argument: (curves, statistics,...)

Example: " city's urban passenger transport demand is 100 million trips in 2019. It is projected to grow by 75% by 2050. What will be the total demand in 2050? "

- **SOLUTION :**

Introduce your innovative solution and how it addresses the problem. Explain how it works... Highlight the unique value proposition (why it's different from existing solutions).

- **DATA ANALYSIS & MARKET RESEARCH :**

Back up your project with research and insights. Present relevant statistics, market insights, or case studies. Show why there is a demand for your solution. Include customer feedback, surveys, or industry trends.

- ***BUSINESS MODEL CANVA (BMC) :***

Use the Business Model Canvas to explain:

Customer Segments – Who are your target users?

Value Proposition – What benefits does your solution provide?

Channels – How will you reach your customers?

Revenue Streams – How will you generate income?

Key Activities – What steps are needed to implement the solution?

Key Resources – What resources (tech, people, funding) do you need?

Key Partners – Who can help you grow (investors, businesses, etc.)?

Cost Structure – What are the expected expenses?

STEPS

Business Model Canvas

Key Partners	Key Activities		Value Proposition	Customer Relationships		Customer Segments
	Key Resources			Channels		
Cost Structure			Revenue Streams			

STEPS

- ***FUTURE WORK & SCALABILITY:***

How will you improve your project in the future? Can your idea be expanded to other regions or industries? What are the next steps for development and funding?

- ***RQ:***

- . Teams can add any extra elements These are the necessary parts of the project presentation, but you are free to add any additional elements that will help you present your project effectively! Creativity and innovation are encouraged
- . Your presentation will take only four minutes
- . Don't over use Artificial Intelligence in your project or you will be excluded

- ***Pro Tips for an Effective Presentation:***

Keep it clear and engaging – Avoid too much text; use visuals.

Use real data – Support your points with research.

Stick to the time limit – Keep each section concise.

Practice your pitch – Ensure smooth delivery.
